1. Introduction

This manual describes the installation and uninstallation procedures of WinActor7 Browser Agent for Chrome and Edge.

By installing WinActor7 Browser Agent, operations on the web browser Google Chrome or Microsoft Edge (Chromium) can be recorded by WinActor.

The term "Microsoft Edge" in this document refers to "Microsoft Edge (chromium)." On "Microsoft Edge (EdgeHTML)," which is sometimes called EdgeHTML or Legacy, the Chromium extensions does not work. Please do not confuse them.

1.1. Operating environment

The version of web browsers to be operated with WinActor7 Browser Agent for Chrome and Edge is shown in the table below. The OS environment complies with the conditions of WinActor.

No	0.	Web browser	Version
1	1	Google Chrome	100 or later (Official Build)
2	2	Microsoft Edge	100 or later (Official Build)

Table 1-1. Version of Google Chrome

1.2. Trademarks

The names described below and other names of companies and products in this document are trademarks or registered trademarks of their respective companies. The TM, \mathbb{B} , and \mathbb{C} marks are omitted in this document.

• WinActor is a registered trademark of NTT ADVANCED TECHNOLOGY CORPORATION.

 Microsoft, Windows^{*1}, Microsoft Edge, Excel, and VBScript^{*2} are trademarks or registered trademarks of Microsoft Corporation in the United States and other countries.

- *1 The official name of Windows is Microsoft Windows Operating System.
- *2 The official name of VBScript is Microsoft Visual Basic Scripting Edition.
- The names of other companies and products are trademarks or registered trademarks of their respective companies.

1.3. Notes on this manual

- The copyright notice "Copyright © 2013-2025 NTT, Inc. & NTT ADVANCED TECHNOLOGY CORPORATION" attached to this manual and the provided software cannot be changed or deleted. The copyright of this manual belongs to NTT, Inc. and NTT ADVANCED TECHNOLOGY CORPORATION.
- The descriptions in this manual assume that users understand Windows operations and functions. For information that is not described in this manual, see the documents provided by Microsoft.

1.4. Limitations

The following are limitations on recording operations on a web browser by WinActor using WinActor7 Browser Agent for Chrome and Edge.

- The page for recording will be identified by its document title. If there is a page or a tab with the same document title as the page for recording, operations on both pages will be recorded.
- Screenshots associated with the recorded actions will not be taken.
- "Set value" operation (drag and drop from the Variable list) cannot be used during recording.
- During "Get value" operation, a target element will not be highlighted by hovering the mouse over it.
- If you want to cancel "Get value" operation, press the ESC key.
- The screenshots of Google Chrome used in this manual are from Google Chrome version 100.0 and Microsoft Edge version 100.0. Note that the appearance may differ depending on your Google Chrome version or settings.
- Although the extension name "WinActor7 Browser Agent" is used in this document, the extension name "WinActor7 Browser Agent for WinActor Ver.X.Y," where "X.Y" represents a version number of WinActor, is used on the browser operated by WinActor v7.6.0 or newer. Therefore, users of WinActor7.6.0 or newer shall read "WinActor7 Browser Agent" in this document as "WinActor7 Browser Agent for WinActor Ver.X.Y."

If the version of the WebDriver WinActor uses does not match the version of Google Chrome or Microsoft Edge (Chromium), the WebDriver may not work properly. In such a case, see "WinActor Browser Operation Scenario Creation Manual" and install the WebDriver that match your Web browser.

2. Installation procedure on Google Chrome

2.1. Online installation procedure on Google Chrome

In general, the online installation procedure works on Google Chrome.

In special cases, such as unavailability of the network connection, where the online installation is impossible, choose the off-line installation procedure described in the next section.

(1) Launch WinActor and select "Tool," "Install extensions," and "Install WinActor7 Browser Agent for Chrome" consecutively.
